Irene Delgado
Asociación Nacional
de Hipertensión Pulmonar

Milano, February 6, 2012

Dear Irene

AIPI, Associazione Ipertensione Polmonare Italiana Onlus, is pleased to announce its endorsement for the establishment of May 5 as the World Pulmonary Hypertension Day.

The World PH Day will be an important tool in raising awareness about PH. It will help to promote legislation, research and early diagnosis that will lead to better quality of life and life expectancy for PH patients across the world.

We wish to show our appreciation for the efforts devoted by the Asociación Nacional de Hipertensión Pulmonar to the organization of the first celebration of this important event.

AIPI will disseminate the establishment of the World Pulmonary Hypertension Day and we hope to celebrate its success each year until we achieve our goals of a better future for those who suffer this terrible disease.

Best regards,

Pisana Ferrari

President
